

WHEN JUST ANY  
DOOR WON'T DO  
HANDCRAFTED,  
CUSTOM WOOD  
DOORS

  
**VINTAGE**  
HOMES+MILLWORK

# CREATING ONE-OF-A-KIND WOOD DOORS IS OUR PURPOSE ... AND OUR PASSION

We are a team of skilled custom builders, designers, millworkers, and project managers who know the value of using quality materials and time-tested construction practices to create wood doors, windows, and timber frame homes built for durability and beauty.

## OUR CRAFT IS ROOTED IN OUR HERITAGE

Vintage Homes and Millwork was born out of the long-standing partnership of Ben Esh and Daniel Glick, founders and owners of B&D Builders, Mid-Atlantic Timberframes, and Mid-Atlantic Steel Fabrication. As a family of specialized companies, we have all of the in-house skill and expertise needed to bring your design or project to life.

Each door is handcrafted in our Lancaster County, PA manufacturing facility, allowing us to keep strict control on the materials, construction process, and finishing details – so there's never any guessing if the door you envision is the door you'll get.

## OUR DOORS GO BEYOND BEAUTY

Our doors do more than just look good. By blending our time-honored, quality craftsmanship with state-of-the-art machinery, our doors become works-of-art, creating a statement piece for any home or commercial building.

*Our doors can be manufactured to meet  
ADA requirements and guidelines.*

## RESPONSIVENESS, ACCURACY, AND QUALITY

We understand the demanding pressure architects and builders face. We also know the value of having a trusted, turnkey partner. That's why we make it our job to make your job easier. This means we have perfected a streamlined process to specify, order, and install our high-quality custom doors. Whether you need a handful, hundreds, or just one door, our team has the expertise and capacity to stay hands-on from start to finish.

## OUR ADVANTAGE

Our in-house Millwork Shop offers advantages. The same team that drafts your design also mills your door, so you can be sure that the design you approved is what you'll see at the end. Our in-house capabilities provide you with turnkey service and timely turn-around.

- Custom trim work
- Custom grid doors
- True or simulated divided light doors
- Engineered doors

## ENGINEERED FOR DURABILITY

Every Vintage Homes and Millwork door is designed with kiln dried, quarter-sawn wood and uses engineered side stiles for durability and strength. We layer quarter-inch pieces of wood, strategically positioned with the grains running in different directions, to form the core of your door. When compared to traditional solid wood construction, our technique minimizes points of weakness, reduces warping, and provides better thermal insulation.

# DESIGN. ENGINEERING. FABRICATION.

We are perfectionists and it shows. We source only the highest quality natural and reclaimed wood, use only the best equipment, and work with only the best craftsmen in the industry. We can even blend the beauty of natural and reclaimed woods, by giving your natural wood door an older, more weathered appearance.

*Our high-level design work allows us to create stunning doors from reclaimed wood. We specialize in sourcing hard-to-find, quality barn wood.*

*Enhance your garage with custom wood doors. From accordion style to an overhead door, we can create doors tailored to any garage.*

*Slider doors from natural or reclaimed wood enhance a home with style and functionality.*

*From narrow to wide, with windows or solid, our custom interior doors are built to last and add value to a home or commercial building.*

# HAND-FORGED HARDWARE TO SET YOUR DOOR APART.

Nothing says quality like true hand-forged hardware. Vintage Homes and Millwork prides itself on its in-house expertise, creating one-of-a-kind hardware for exterior, interior, and garage doors. Like our doors, we are hands-on from start to finish, which means you will only get a top-quality piece, at a fair price. For those looking for a more traditional option, we can supply that too.

Our custom options include:

- Oil-rubbed, bronze ball bearing mortise hinges
- Antique hammered strap hinges, push-pull, and track and trolley hardware
- Custom lock sets
- Panic hardware and concealed closures

*Antique hammered strap hinge*

*Antique hammered door pulls*

*Track and trolley hardware*

*Custom locks*

*Panic hardware with oil-rubbed, bronze finish*
